

**SYSTEM AND METHOD FOR PROVIDING PHYSICAL WEB SECURITY  
USING IP ADDRESSES**

**ABSTRACT OF THE INVENTION**

A system and method for providing security for an Internet server. The system comprises: a logical security system for processing login and password data received from a client device during a server session in order to authenticate a user; and a physical security system for processing Internet protocol (IP) address information of the client device in order to authenticate the client device for the duration of the server session.
